

UNDERWATER SECURING OF SEA CHESTS

Our company BEVALDIA undertakes the securing of your vessel's sea-gratings by welding in order to avoid the dangerous visitors who are thinking of sneaking and hiding drugs in the sea-chests.

Lately, it has been observed that there is an increase in the transport of dangerous substances in the sea-chests, which means that such a service will ensure the security of your good vessel and the expenses caused by delays without reason.
