

UNDERWATER COMMUNICATION SYSTEM

The **underwater communication system** has been carefully tested by the experienced GAMSRO team to be able to offer the highest quality. The underwater communication system can be combined with the latest underwater throat microphones (throat phones) with a special underwater cable of high quality and durability that is adapted to withstand difficult working environments under water.

The underwater communication system is capable of simultaneously supporting one or two divers while being able to record. It also has a digital battery indicator capable of 40 hours of continuous use.

Its ease of use made it the first choice even for beginners. The underwater communication system is mounted in a high-quality waterproof case. Its weight does not exceed 4.9kg.

SPECIFICATIONS

Battery life: 40 hours continuously

Output power (watts): 20

Charging time: 140hours, optional cell batteries

Controls: **Volume:** Tender, Fiver, 1&, Speaker, PTT, On/Off, Select diver 1, 2, or both, mic

Speakers: Heavy duty front panel, optional headset with microphone

Low Battery indicator: LED display battery meter

Battery type: 12-volt rechargeable batteries

Dimensions (L x W x H): 15,8" x 12,1" x 6,8"

4,4lbs (empty) 10,9lbs (with battery)

Case Nanuk 915 professional protective cases
